**Subject:** RE: EMWMF SAP D1

I asked for it since there has not been an update to the CMP to capture any monitoring requirements associated with the SAP.

Don't worry, I do not intend to address any issues associated with this project, but since the CMP is not current for this project (according to Sid as a response to Pat's inquiry) and we just finished the FYR scoping, I wanted to see what may have been missed.

**Importance:** High

Good morning,

Thank you Connie for a copy of this SAP. It is only "interim" and was approved by necessity (the landfill needed an operational SAP). It will be revised and the EMWMF-EMDF project team is working to address the remaining outstanding issues including radiological discharge limits.

I recommend that you leave this document in the capable hands of the EMWMF-EMDF project team to resolve the remaining issues and update it as opportunity and objectives require. We are not currently soliciting outside help in our discussions.

Thanks,

Carl

Cathy and Carl,

This is the current SAP that is applicable to the EMWMF that is the result of dispute resolution. I do not have a copy of the resolution agreement but will attempt to obtain. Impacts of the SAP and associated monitoring have not been captured (but should be) in a Comprehensive Monitoring Plan (CMP), which is a primary document. The monitoring issue was raised on the FFA PM meeting on 2/23/2021. The lack of monitoring via the CMP impacts the FFS (maybe) but definitely the next RER (2021) and FYR (to be signed 3/19/2022).

We will need to get a modification to the CMP as soon as possible.

I've shared the SAP with Martha who suggests that we conduct an in-house discussion on the SAP.

Regards,

---

**Subject:** EMWMF SAP D1

At the FFA Project Managers' meeting Tuesday you asked for a copy of the EMWMF SAP. It is attached. When this version was approved, there was an understanding that upon resolution of the remaining issues, the SAP would be revised.
